**Subject:** FW: Draft Harbor Bridge EJ Air Comments  
**Attachments:** OEJ Draft Air Comments on Harbor Bridge FEIS 1.07.14.docx

Good Morning,

Stan Buzzelle has provided draft comments for concerns OEJ has with the Harbor Bridge FEIS. I don't know how much discussion of these there will be on the EPA-only call today, but I wanted to provide them in advance of the call since several of you had expressed interest in seeing what OEJ was developing.

**Subject:** Draft Harbor Bridge EJ Air Comments

Hi Jeff,

Happy New Year to you and your family! Thanks for all your help with the Harbor Bridge air issues. After consulting with you and with James Gavin (OFA) I've drafted some EJ air comments. Can you please look at these with a critical eye before my OD, Matt Tejada sends them to R6 for consideration? James Gavin and some folks in OTAQ are also looking them over. As you may be aware, the comments are due to R6 by 12pm on Monday, Dec. 12<sup>th</sup>. If you're able to get me your insights/comments by COB this Friday, that should give me time to make any needed corrections/edits.

As we discussed, I've tried to keep the focus of the comments on issues revolving around the need for a localized analysis, rather than a regional analysis of air impacts. The consistent request throughout the comments is for monitoring. After talking with James, I felt it would be appropriate to request near-road monitoring and an adaptive management plan, given the circumstances.

Please feel free to share this with folks at R6, as appropriate, but please keep in mind that this is only an initial draft. Changes may occur, based on feedback from you, James, and OTAQ.

Thanks again for all your help with this,  
Stan
